Sprint 2 Report
Assignment Plus
Connor Barnes, Kyle Fong, Ryan Oliver, Joshua Gutterman
November 4, 2016

Actions to stop doing:
- The team should stop discussing task details and interdependencies with each other during scrum meetings because it detracts from the purpose of scrum meetings
- The team should stop missing scrum meetings because holding a scrum meeting without the whole team is ineffective

Actions to start doing:
- The team should use the scrum board more often because it is currently difficult to keep track of who is working on what and what tasks still need to be completed
- The team should start committing and pushing their work to git more often since a large portion of the code written by the team has not been pushed to the repository

Actions to keep doing:
- The team should continue to improve the rate at which tasks are completed because there have been many setbacks and the project deadline is approaching
- The team should continue collaborating with one another when working on similar tasks because it helps ensure that the individual parts of the app will behave as desired when interacting with the other parts of the app

Work completed:
- Fix the view model so it is adaptive and autoscales to fit screen size
- Create database
- Create login screen viewmodel for app that allows the user to enter their credentials
- Hide the user's password while they are entering it
- Create "sign up" screen view model for app that allows the user to enter their account information

Work not completed:
- Set the database up to create a new account with the data received from the app
- Implement code to parse text fields from login viewmodel and prepare to send to database to create new login credentials
- Allow database to verify user credentials received from app
- Take the login information entered by the user and send it to the database for verification

Work completion rate:
- Total number of user stories completed: 0
- Total number of estimated ideal work hours completed: 15
- Total sprint length: 16 days
- User stories per day: 0
- Work hours per day: 15/16 = 0.9375
